

## Demonstrate Accountability

The easy-to-use **Community Care Center™** reports provide information that will help answer important questions about how your program is operating.

- Are you making an impact? What is the impact?
- What services and how many hours of those services are you providing to your community?
- Who are your top providers and what are they providing?
- Is your staff qualified, diverse and taking advantage of professional development opportunities?

**Community Care Center™** also provides vital information needed for administrative reports, grants, development of funds, and community outreach.

**It's as easy to use as the Internet.**

## Product Licensing

**Community Care Center™** licensing was created to address the unique needs of nonprofit and human services organizations. In order to keep **Community Care Center™** affordable, Dynamic Enterprise Solutions (DES) has structured its licensing program as a subscription based service renewed annually. License costs are based on number of locations the licensee services.

### Each License includes:

- No limit on the number User Accounts
- No limit on the number of cases/students that may be tracked
- Capability to define look and feel to match your organization
- Capability to define unlimited number of outcomes/measures
- Customizable Security
- No technical installation required
- Initial Product Training

"Transforming data into information"

### Running a non-profit organization can be immensely rewarding.

However, non-profit organizations have special needs ranging from community-building efforts to reporting critical data elements to funders and support agencies

### Help is here!

**Community Care Center™** is an affordable, easy to use, secure internet-based application that can help you operate an effective non-profit organization – and do so without the need of expensive computer hardware and software.

**Community Care Center™** is a full-featured application can help you get the work done – quickly, easily, and intuitively without extensive staff. You can manage providers, services, client or case management data, financial and grant information, contributions, and a variety of other performance factors all through our unique web accessed application.

If you can surf the net, you are ready to use

**Community Care Center™**

### Community Care Center Provides:

#### Case Management

Track the populations you serve including the services each individual receives as well as the impact (outcomes/measures) of those services. Demonstrate the impact of your program through easy to use online reports.

#### Providers

Track provider contacts, contributions, and services. Demonstrate the impact providers have on your program through easy to use online reports.

#### Program Training

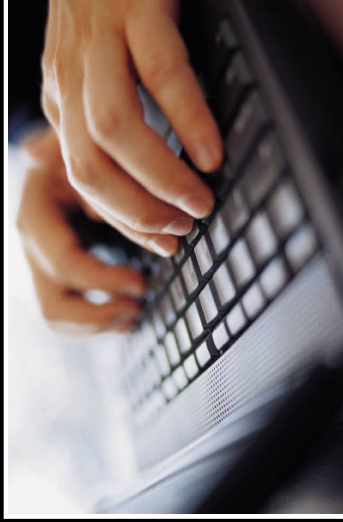

Track important staff health and safety issues – health requirements, child abuse and neglect background checks, and other required training. Track attendance at training and educational sessions including credit hours earned, clock hours, and other information needed for licensure and professional development.

#### Evaluation and Program Improvement

**Community Care Center™** import and export features allow data collected through the system to be combined with other data (grades, attendance, and other information) for those interested in program analysis and evaluation.

#### Reporting

**Community Care Center™** provides high quality reports that are available online. All reports can be viewed online or saved as Microsoft Excel files.

**Community Care Center** is an internet-based application that collects data through a user-friendly web browser interface (Netscape or Internet Explorer).

**Community Care Center** uses industry-standard security features including Secure Socket Layer data transmission, user log in, and security audit trails.
